OrionNet Systems – Celebrating 16 Years

OrionNet Systems celebrated their annual company anniversary on August 4, 2017.

OrionNet Systems is an Oklahoma business founded in 2001. OrionNet Systems' ThinkHealth Practice Management and EHR system is an enterprise-wide solution developed and specifically tailored for the mental health and substance abuse industry. ThinkHealth was designed to provide seamless assistance to organizations, to improve billing accuracy and to increase the quality of care for your clients. This continues today as our promise to our members to help them advance and grow as a company. Discover why clinicians across America prefer using the ThinkHealth software to assist with their daily operations.

The OrionNet Systems team enjoyed the afternoon off on Friday to celebrate the 16th anniversary. The company spent the afternoon enjoying Cajun seafood and celebrating at the local bowling alley. The company splits into teams and plays a few friendly yet competitive rounds of bowling. Celebrating 16 years and many more to come, the OrionNet team looks forward to the future growth of the company. We are excited about the new and upcoming advancements of OrionNet Systems and the direction the company is headed.

ThinkHealth Now Has

Clinician Activity Training

OrionNet Systems next Clinician Activity Training will be held on Thursday August 3, 2017. We are happy to announce this training will mark one year of OrionNet Systems getting approved to offer CEU's to our members. Rachel Bell, our trainer was first approved to conduct these webinars by the Oklahoma State LADC Board and later gained approval from the State Board of Behavioral Health licensure. The first Clinician Activity Training that offered continued education credits was held on August 18, 2016 and covered the Activities and Notes Module.

Over the last year, our CEU trainings have grown tremendously and we have been able to offer CEU's for the Treatment Plans, CDC's, and Screening and

Texas doctor gets 35 years in prison for \$375M medical fraud

A 60-year-old Dallas-area doctor has been sentenced to 35 years in prison for helping defraud Medicare and Medicaid out of almost \$375 million.

A federal judge also ordered Dr. Jacques Roy on Wednesday to pay more than \$268 million in restitution. A jury in April 2016 convicted the Rockwall physician of nine of 10 counts of defrauding a healthcare benefit program.

SAMHSA research sheds light on prescription drug misuse

SAMHSA's 2015 National Survey on Drug Use and Health (NSDUH) shows that most individuals who misuse prescription drugs do so in response to the condition for which they were originally prescribed the medication. According to the NSDUH data, 91.8 million Americans ages 18 and over (37.8% of the U.S. adult population) used prescription pain medications within the prior year. [More Information](#)

ThinkHealth 30 Second Contest!

OrionNet Systems is looking for the TOP 3 video testimonials. Gather your coworkers and create a 30 second video telling us why you love ThinkHealth! Submit video by August 30th, 2017

Winners to be announced on September 1st!

- 1st Place - \$75
- 2nd Place - \$50
- 3rd Place - \$25

Send video to onsmarketing@coxinet.net

Videos will be posted on our website and used for marketing purposes and new customer references. Winners will need to sign a video and audio release

Oklahoma Ranked 39th In Best States For Health Care

When it comes to great health care coverage in the United States, Oklahoma ranks in the bottom half.

More Americans now have access to health

Suicides in teen girls hit a 40-year high

The suicide rate among teenage girls continues to rise and hit a 40-year high in 2015, according to a new analysis released Thursday.

More Americans now have access to health care than in decades past, but the cost and quality of service can vary widely depending on where someone lives.

With the continuing battle in Washington over the future of health care in the United States, experts at personal-finance website WalletHub decided to do some digging into the quality of health care on a state-by-state basis.

released Thursday.

Suicide rates doubled among girls and rose by more than 30 percent among teen boys and young men between 2007 and 2015, the updated breakdown from Centers for Disease Control and Prevention finds.

It's all part of a growing national trend for more suicides, said CDC suicide expert Thomas Simon.
